

The Next Generation of Data Management

One Source - Many Options

The dab:Exporter supports SAP® from SAP® R/3® 4.5 upwards. You can choose between several target formats, including ACL Analytics™, ACL AX™ 4.0, CSV, GDPdU and – new in version 3 – Microsoft SQL Server™.

Big Data

Huge amounts of data can be handled easily. Downloading data with dab:Exporter will not impact the performance of the SAP® system.

dab:Exporter 3

CCM & GRC

Shared environments, automating analytics for GRC or CCM-solutions - thanks to the Client/Server architecture, dab:Exporter is ready to support big scale data analytic tasks and efficient teamwork.

Data Protection & Encryption

You can protect sensible data by encrypting it during the download. This allows you to comply with legal requirements (like the German BDSG § 32) or internal guidelines.

Version 3 of dab:Exporter sets new standards at managing and analysing big amounts of SAP® data. Our solution allows you to access SAP® data efficiently and to convert it into formats which are best fit for data analytics, like ACL Analytics™, AXL AX™, GDPdU, Microsoft SQL Server™ or CSV. The seamless integration into leading CCM solutions as well as the state of the art Client/Server architecture support you in automating your Big Data analytic tasks, and work together in teams in any collaborative environment.
