

# A brief summary of DataConsulting's ACL open-enrolment training course.

Based on DataConsulting's ACL Open-Enrolment Training Course Survey Results collected by  SurveyMonkey® from August 2016 - May 2019.

This is a brief summary of the findings from [DataConsulting's ACL Open-Enrolment Training Course Survey Results](#) which is compiled from the 46 survey responses received from attendees between August 2016 and May 2019.

## What the survey results say...

**61%** of attendees found out about the training course through other means (e.g. we were recommended by a colleague, client or company).

of attendees felt the level of information and communication they received prior to their training course was just right (we don't send too much or too little). **89%**

**ALL** of our attendees agreed the instructor of their training course was either extremely or very knowledgeable when it came to the course content.

of attendees felt their training course's material and its content were worthwhile to them and relevant to their ACL needs. **96%**

 is the average rating our training course venues, locations, environments and amenities get from those that attend.

off attendees who complete one of our open-enrolment courses leave feeling more confident than when they arrived when it comes to using ACL analytics software. **96%**

**9/10** people who attend one of our ACL open-enrolment training courses feel it gives excellent or good course content and value for money.

## Some bits we're proud of...

a welcoming team with friendly, knowledgeable instructors

courses which provide excellent content, delivery and value for money

delegates leave feeling better equipped to use ACL analytics
